Your employees are working everywhere. Is your security?

Lenovo modern devices running Windows 10 Pro give your remote workforce the same advanced security protections they would get at the office.

Build a safety net for your team with these critical protections

ThinkPad X1 Carbon

Frictionless authentication

Biometric and picture password technology from Windows 10 Hello takes the peril out of passwords.

Lenovo devices also have the most secure fingerprint readers in the industry, and tap-to-logon makes badge-enabled access a breeze.

Autonomous antivirus protection

SentinelOne® is a next-generation AI-powered active endpoint detection and response (EDR) solution that predicts and stops even zero-day attacks.

Leading BIOS security

Microsoft Secured-core PCs boot up against a security checklist, verifying integrity every time the device is turned on.

With the built-for-business power of the Intel vPro® platform, Lenovo ThinkShield provides BIOS that can self-heal in the event of corruption for minimal disruption or downtime.

Endpoint management

Help is never far away. Absolute Persistence® software and Intel Active Management Technology on the Intel vPro® platform ensure employees and their devices never lose contact with corporate IT.

74%
of companies plan to permanently shift to more remote work post-pandemic.[1]

17 million
On average, employees have access to more than 17 million company files.[2]

53%
of companies have more than 1,000 sensitive files accessible to every employee.[2]

ThinkShield: Smarter security for your employees

ThinkShield is Lenovo's security portfolio of hardware, software, services, and processes — fully customizable solutions to secure your critical data and business technology.

Lenovo recommends Windows 10 Pro for business, powered by the Intel vPro® platform.
