Your #1 priority:

Lenovo Chromebook with Chrome Education Upgrade

Smarter technology for all

Lenovo

Google for Education

Upgrade empowers learning anytime, anywhere.

As learning evolves, the Lenovo Chromebook with Chrome Education Upgrade is empowering educators and equipping students for what's next. Each solution is designed to be easy to use, flexible, scalable, and secure – supporting connection and collaboration.

Connection is critical.

81.3% of faculty are worried about ensuring that students stay motivated and engaged before, during, and after class.

With the right EdTech tools, teachers can inspire curiosity, sparking the creative thinking and outside-the-box learning needed for tomorrow's career landscape. Whether learning takes place in the classroom, at home, or within a hybrid model, Lenovo and Google for Education nurture individual needs and enable students to learn better.

Everything needed for adaptive learning, all in one box

At Lenovo, we are laser focused in our pursuit to support educators around the globe as they challenge themselves every day to reimagine and reinvent teaching in the modern classroom.

Driven by innovation, our robust portfolio provides the devices, services, and software that your education community needs to increase student engagement, fulfil student potential, and connect to learners everywhere now and in the future.

Why Chromebook

Chromebooks are easy to use, rugged, and affordable.

They boot up in seconds, deliver powerful performance and feature an all-day battery life. Powered by Chrome OS, they have built-in virus protection, feature thousands of apps and update automatically – giving teachers and students access to the latest software without slowing them down.

30+ million students worldwide use Chromebooks

Why Chrome Education Upgrade

Chrome Education Upgrade allows schools to manage hundreds of Chromebooks in seconds.

IT admins can deploy new devices, customise features and configure security settings from one cloud-based admin console. Personalise the student experience by sharing material with the class in real time and rolling out standardised tests with 'Kiosk mode'. Plus, you can remotely disable or wipe stolen devices in an instant. And it comes with free 24/7 support from the experts at Google.

⟲ LANSCHOOL

LanSchool's classroom management software empowers educators to guide learning, increase collaboration, and maximise teaching time – wherever learning happens. With LanSchool, teachers get full control over what the students see in real time.

They can monitor everyone's device at once, see who's doing what – and who needs extra help. They can control the websites pupils can and can't access and use browsing alerts and reports to ensure safety. And they can lock everyone's keyboards in seconds to refocus attention.

More than 12 million users worldwide rely on LanSchool to simplify and strengthen digital learning.

# Google Meet Series One: The best in class

Everything you need to deliver safe, accessible learning – from anywhere.

With Google Meet Series One Room Kits, educators get all the tools they need to create a connected, engaging, learning environment.

These ready-made solution kits transform any space into an inclusive, hybrid classroom where everyone contributes, and every voice is heard.

They are supported by reliable hardware, software, and services, promoting better learning outcomes while making life easier for the school's IT department.

Make set up simple

Our kits arrive ready to use. Installation is a breeze with a single power source, and you can manage your equipment easily through the Google Admin Console.

Reduce distractions

Our TruVoice audio technology removes background noise and modulates volume levels, so everyone can hear and be heard.

Control with a touch

The low-profile touchpad and single cable mean that the teacher's control screen is always within reach. Or go hands-free with Google Assistant.

Give everyone a front-row view

The 4K smart camera tilts and zooms to focus on the presenter, automatically putting the teacher front and centre using powerful Google AI.

Invite special guests

Video meeting hardware means that educators can invite expert speakers into the virtual classroom from anywhere in the world. Students can engage one on one with the people that know their subject best.

Smarter fosters the future of learning.

Best for K-12 students

Lenovo Chrome devices are made for the challenges of K-12 education at all levels and at any budget. With the right technology for every learning style, enhanced by the Chrome Education Upgrade, students and teachers can unlock their potential and have the confidence to reach it.

10e CHROME TABLET

A just-right device for students on-the-grow

Weighing just over one pound, the Lenovo 10e Chrome Tablet is a perfect fit for students of all ages, especially the youngest learners. Designed to take students from touch to typing to content creation, this durable tablet is built to inspire curious minds.
