

Most comprehensive portfolio of security solutions for end-to-end and customizable protection

ThinkShield PLATFORM

Webcam Privacy Shutter

A simple and secure mechanical camera cover on Lenovo ThinkPads

Secure Wipe

A feature in the BIOS which reliably deletes all data from a drive without the need for external tools

Firmware Resiliency 2.0

Protection, detection, and recovery capabilities for key components of the Firmware platform such as Embedded Controller / FW, BIOS, Flash Descriptor, and Management Engine

Windows 10 Hello

Built-in authentication for Windows 10 that enables biometric capabilities such as fingerprint reader or facial recognition

Secured-core PC

Deep integration between hardware, firmware, Windows 10 operating system, and identity

Tamper Switch

A built-in hardware feature that prevents and/or notifies IT admins of unauthorized, physical access into a system

SecurityEngine

Manages several key security features including root of trust measurements, detection and remediation of overvoltage inputs and protection of storage passwords

Lenovo WIFI Security

Detects suspicious activity and protects your computer from being attacked through a WiFi network
