

3 ways to unlock sustainable performance in the future of work

Safeguard your business now and in the future

The world of work is changing

With remote and hybrid work going full steam ahead, this is a great opportunity for organizations, and IT teams to rethink their operating models and use technology as an enabler to improve the employee experience.

2/3

organizations expect to use technology to improve their employee experience¹

Based on a research on the future of work², you and your IT team can enable productive work from anywhere with Microsoft Modern Management Solutions by Lenovo. By upgrading to Windows 11, you can easily leverage a full suite of AI-enhanced features to keep your employees safe and productive.

Foster outcome-based management of employees by empowering them to perform

Microsoft Modern Management Solutions by Lenovo

Foster IT operations excellence by streamlining your IT ecosystem. This directly empowers your IT teams to focus their efforts on more strategic endeavours and optimizes your IT investments. Now, your hybrid workforce can enjoy 24/7/365 support.

Some of the solutions offered through Lenovo

- 1 Microsoft Intune**
is a secure and comprehensive endpoint management for corporate and BYOD devices.
- 2 Autopilot Zero-touch**
optimizes IT deployment for the hybrid workplace.
- 3 Lenovo Deployment Assistant**
streamlines and automates the daily routines of IT administrators.

Boost technology adoption and use insights derived from data to make better decisions

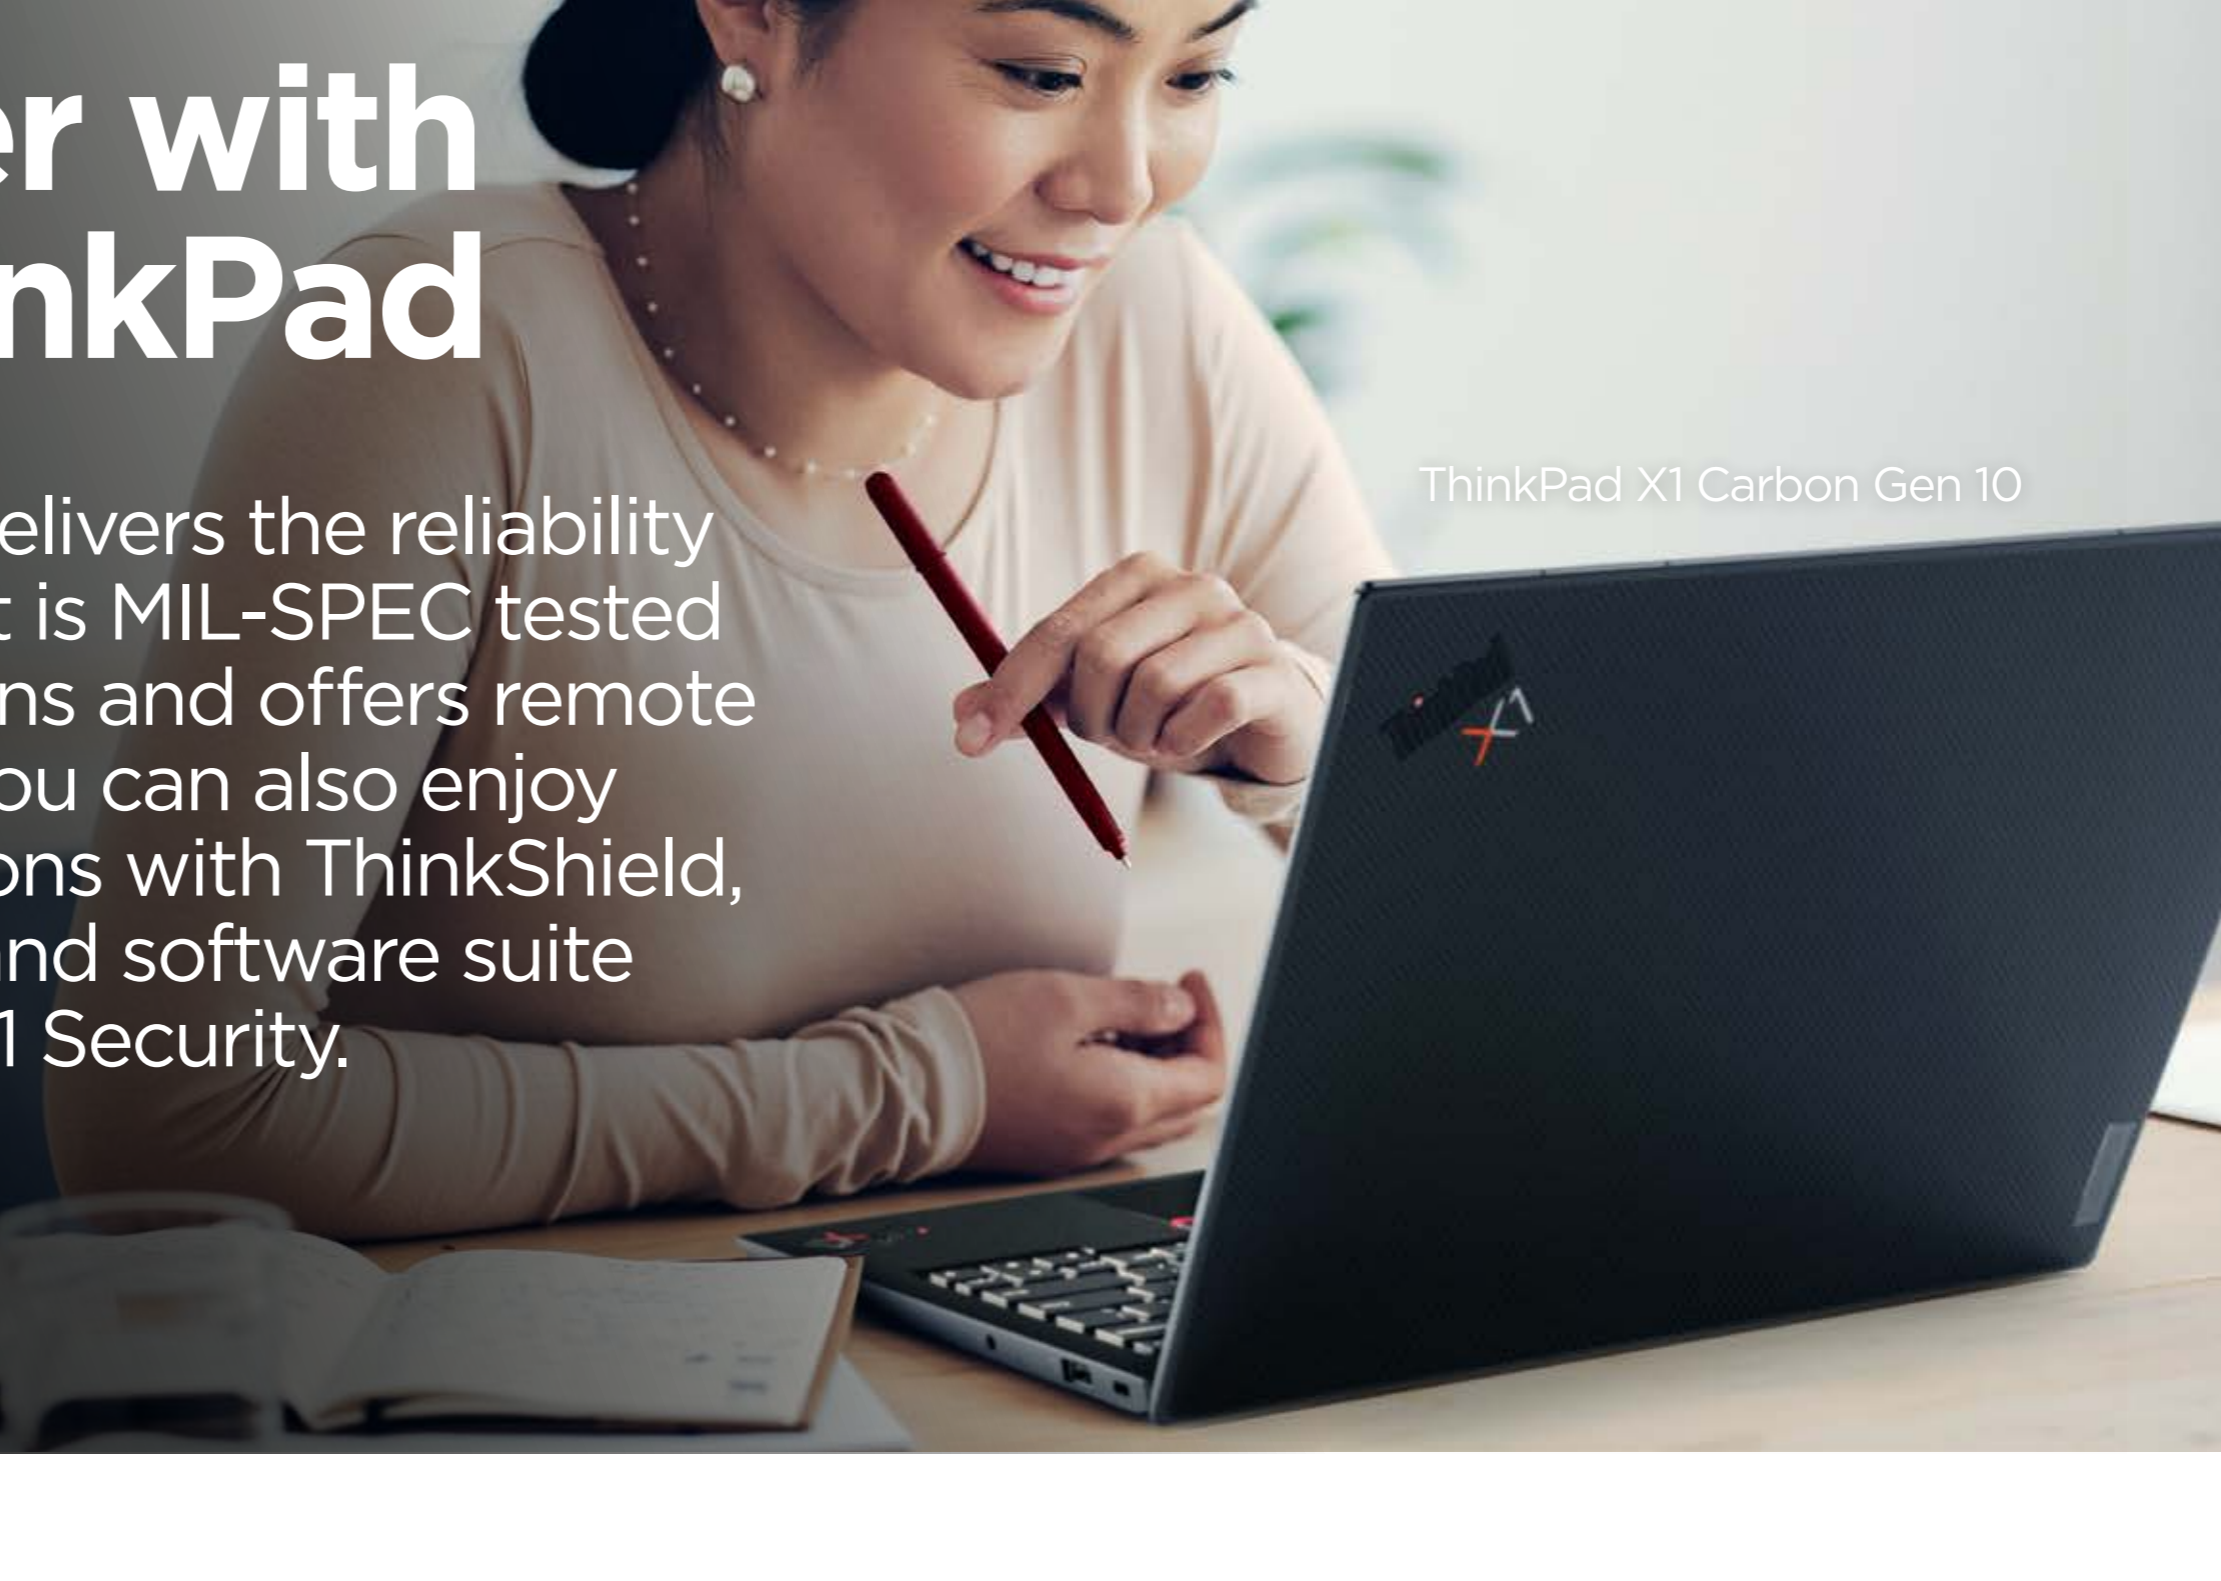

Windows 11 Security with Lenovo Manageability Commander

New technologies can increase security vulnerabilities. Help your IT teams to succeed with Windows 11 security that provides powerful security from chip to cloud, built with zero-trust principles at the core to safeguard data and access anywhere.

With Lenovo Manageability Commander (LMC), your organization can enjoy peace of mind as it integrates with Microsoft technology allowing IT to monitor, restore, upgrade, and protect Lenovo endpoints remotely and securely.

Think Better with Lenovo ThinkPad

Our ThinkPad portfolio delivers the reliability you can count on when it is MIL-SPEC tested against extreme conditions and offers remote manageability options. You can also enjoy advanced security solutions with ThinkShield, an integrated hardware and software suite supported by Windows 11 Security.

ThinkPad X1 Carbon Gen 10

Did you know?

Upgrading to Windows 11 is a seamless process

Move to Windows 11 before Windows 10 end of support in October 2025 – and start taking advantage of AI-powered features:

Multilayered security

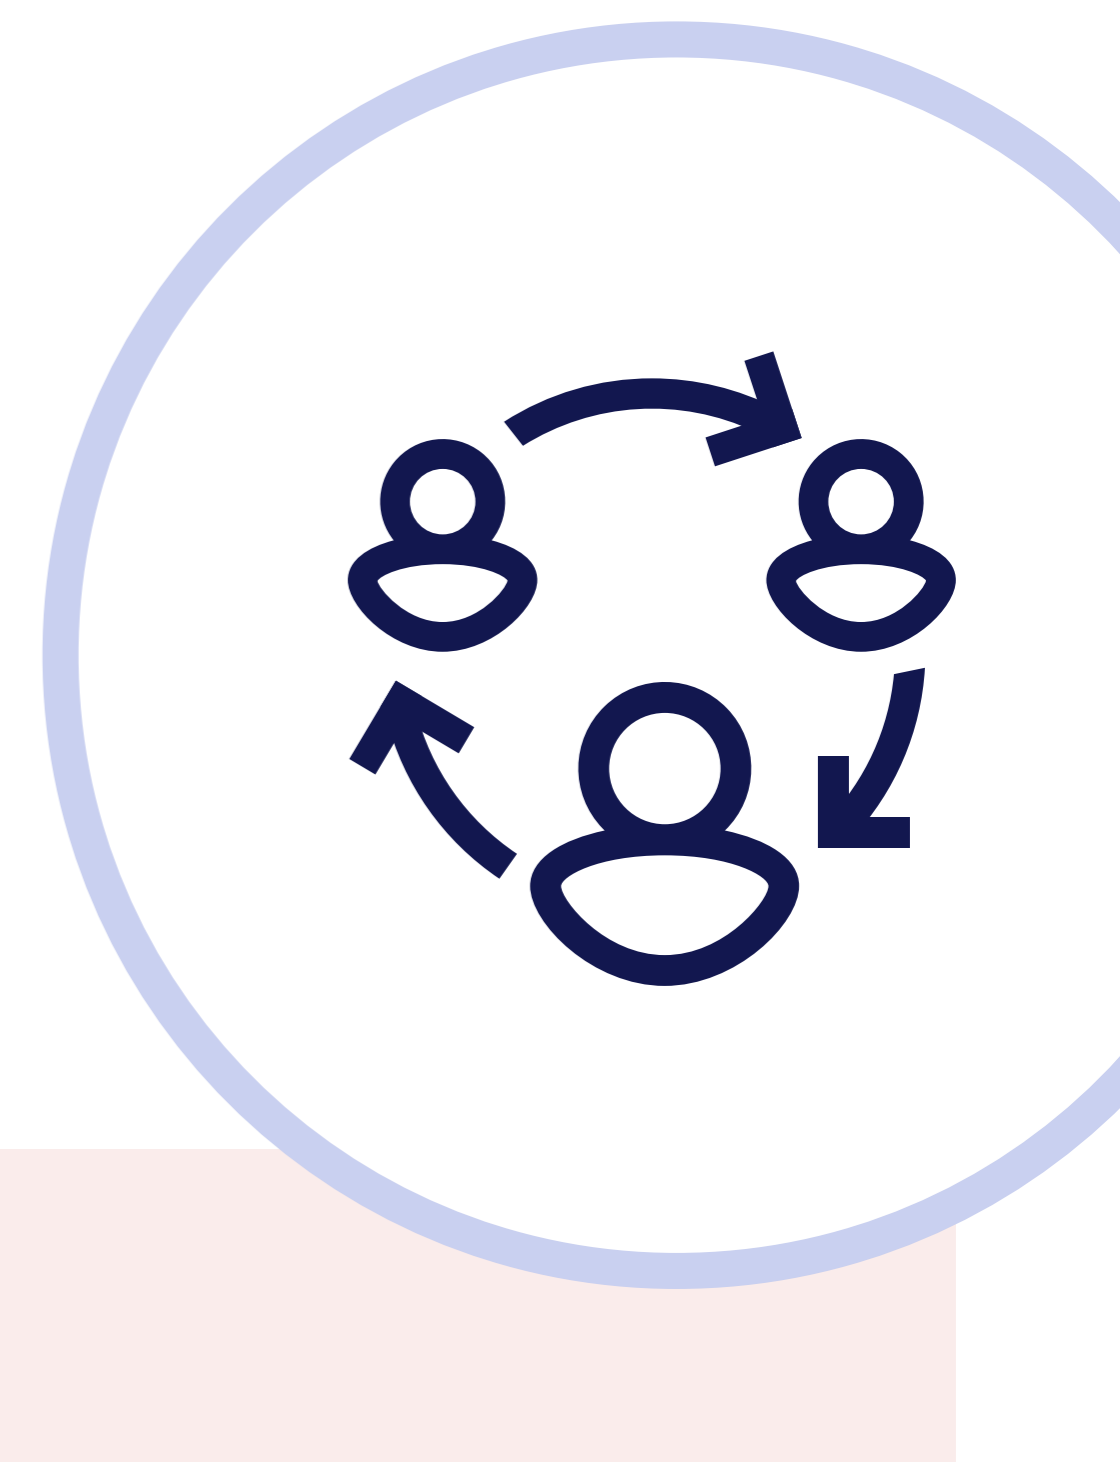

Lenovo devices running Windows 11 are protected with AI-enhanced security right out of the box

A new level of productivity

Get more done with AI-powered multitasking and videoconferencing features

Find new zero-cost, high-optionality ways to collaborate both in-person and virtually

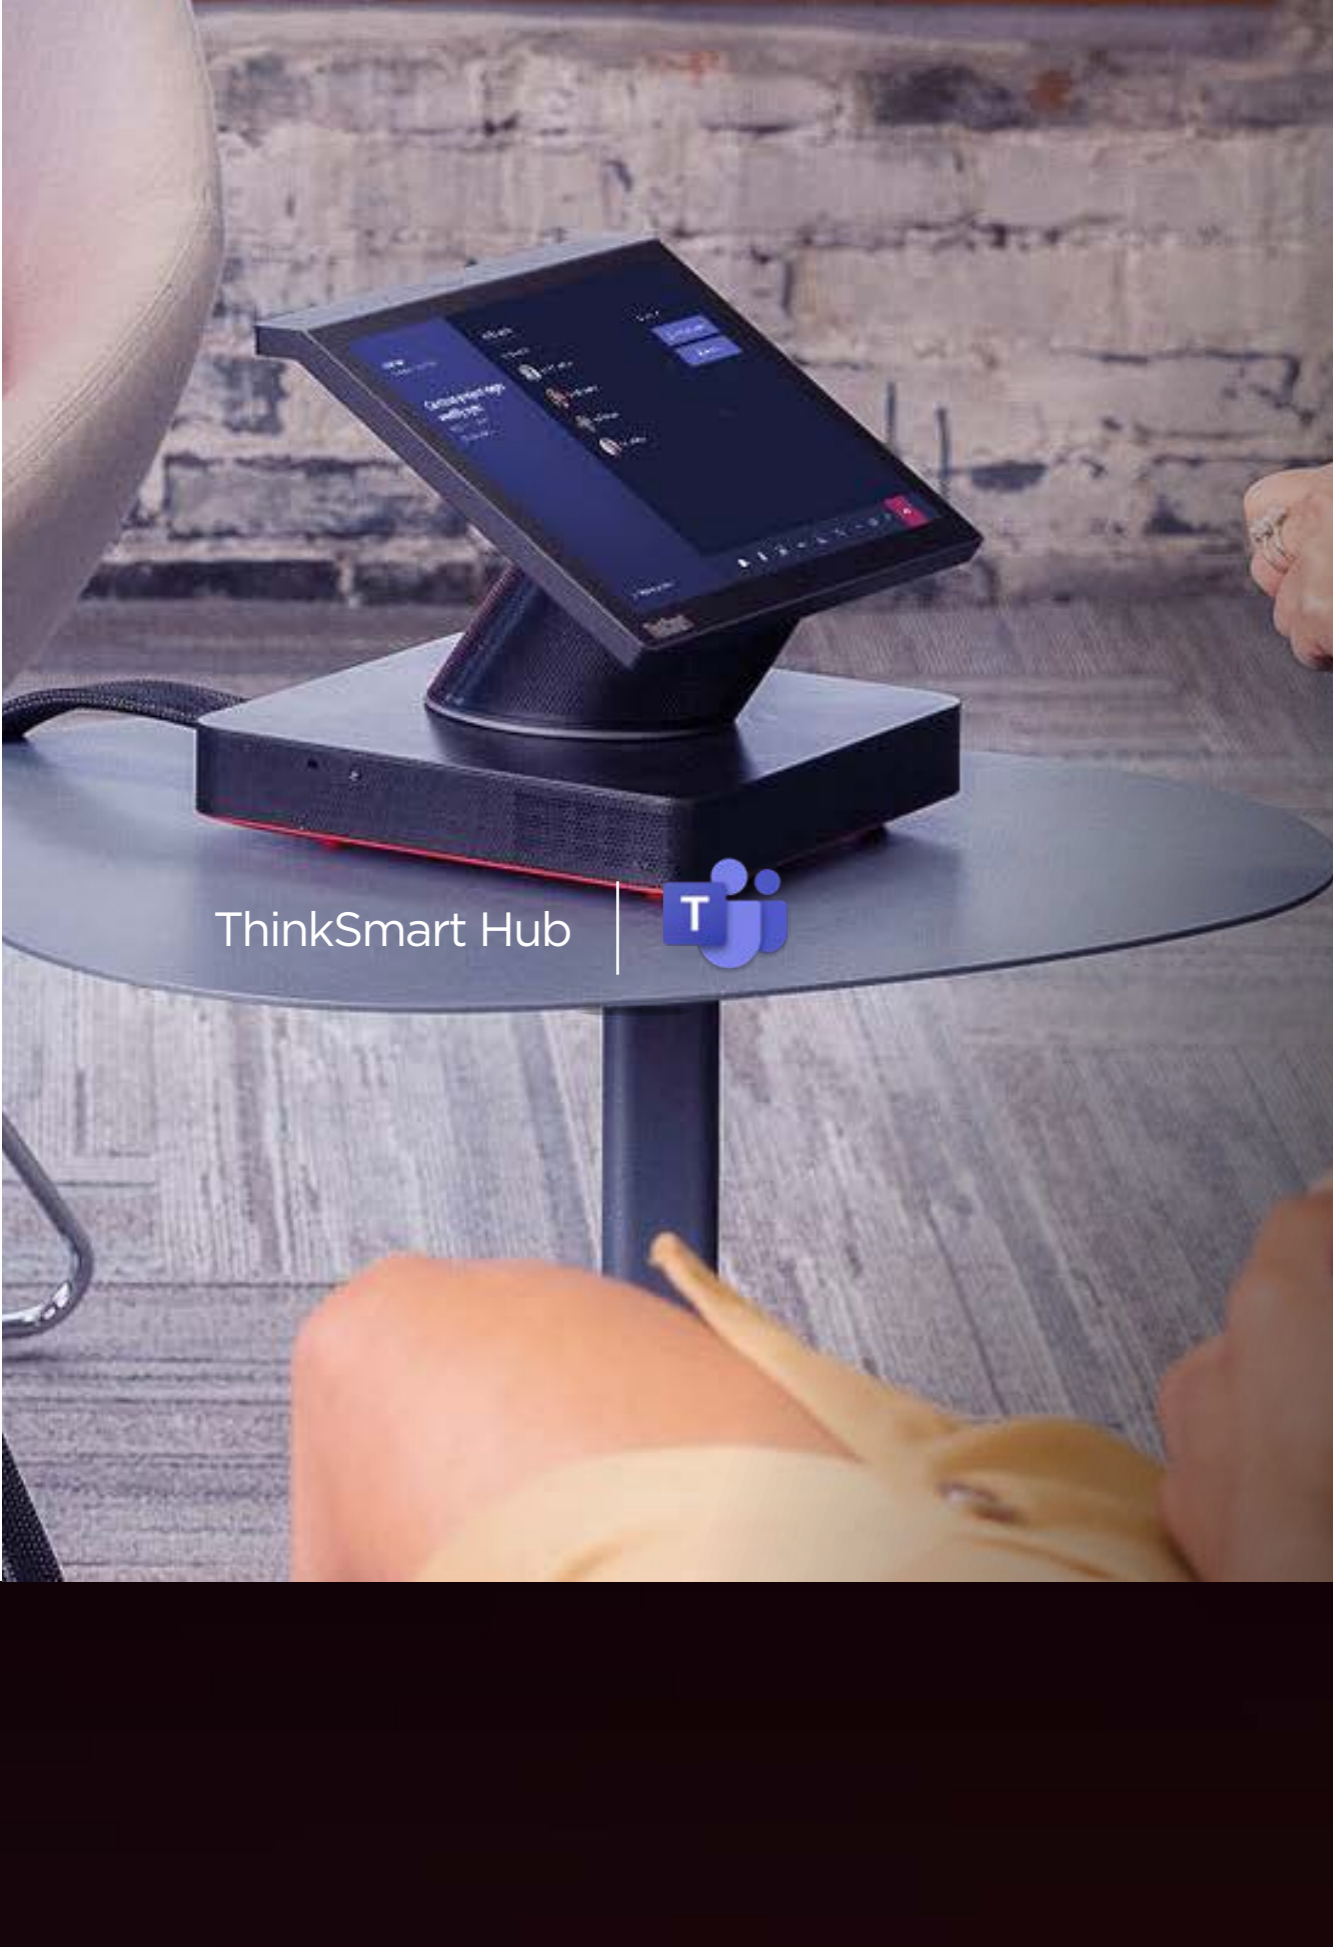

Microsoft 365

The Microsoft 365 portfolio ensures hybrid working productivity increases, helping businesses to evolve. It's much easier to collaborate in real-time, build trust, cement communication and foster the creativity that businesses thrive on.

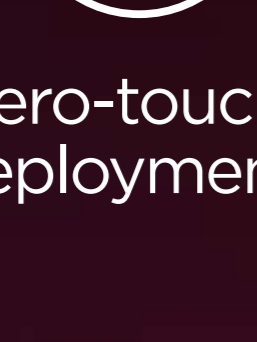

ThinkSmart Hub for Microsoft Teams from Lenovo

Help your teams to collaborate smoothly, whatever the location of participants. When paired with ThinkSmart Cam, for small and medium rooms and ThinkSmart Bar XL, for large rooms, you can create a virtual meeting environment that feels like you're all in the same room together.

Take the pressure off your IT team

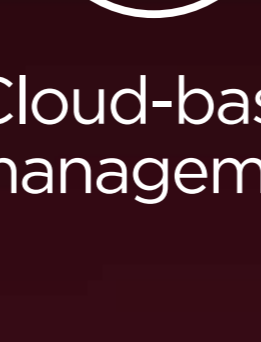

Move on from manual deployment management and enjoy:

Zero-touch deployment

AI-powered support

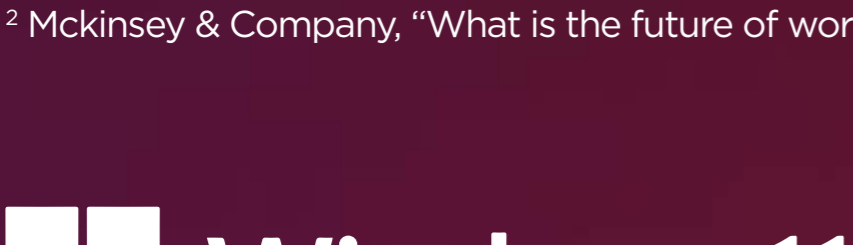

Cloud-based management

Scalable modern management services

Book a Modern Workplace assessment
