# End-to-end IT Infrastructure Solutions to Ensure a Productive Mobile Workforce

Everywhere around the world, the workforce is on the move. Mobility is the name of the game. If you're like most organizations, you're responding to this trend by investing heavily in mobile tools and infrastructure. That's great news for workforce productivity, flexibility, and employee happiness, but it is challenging news for security and control. To get the most out of mobility, it's critical to have a future-ready infrastructure that can keep pace with the new age workforce and style.

# Devices are Decisive

When thinking about a future-ready infrastructure, you need to start with the end computing devices. The devices you choose to give to your employees will have a direct impact on their productivity and efficiency.

- The impact of equipping your workforce with the right endpoint devices is two-fold. It will allow your employees to focus exclusively on their work, rather than having to worry about issues like connectivity and performance.
- The seamless work environment will make for happier employees who are less likely to quit because of an ill-equipped workplace.

# Why Lenovo for Mobility

Lenovo devices transform mobile productivity. We have developed an exceptional portfolio of the highest quality mobile products and services including ultrabooks, convertibles, and tablets. With Lenovo's ThinkPad X1 Series, ThinkPad X Series, ThinkPad T Series, ThinkPad P Series, Lenovo V Series, and Tablets of products, employees get the freedom to work anywhere with uncompromising performance. These devices offer all the essentials for a productive mobile workforce:

## Performance

- Dual and quad-core Processors
- 4-8GB of RAM
- 500GB to 1TB hard drive
- High-resolution LCD screens
- Dual-band WiFi
- Long-lasting batteries
- Windows 10 Pro operating system

## Security

- Windows-compatible
- Hard drive encryption
- Biometric fingerprint recognition
- Protect identity and secure data with **Intel® Authenticate**
- Remote maintenance and wireless manageability with **Intel® Active Management Technology (Intel® AMT)**

## Flexibility

- Full PC capacity in a 2-in-1 device
- Modular expandability
- Light and thin

## Connectivity

- 4G LTE-A mobility
- Optional WiGig dock

## Durability

- MIL-SPEC durability
- AMOLED displays
- Spill-resistant keyboard
- Shatter-resistant glass

## Quality

- Carbon fiber cover
- Disk Drive Bracket to protect the hard drive from shocks and vibrations

# ThinkPad X1 Series

The innovative Lenovo ThinkPad X1 family of mobile devices represents the next generation of enterprise computing, combining sleek, consumer-inspired designs with unprecedented security and IT manageability. It's multi factor authentication (MFA) hardened via **Intel® Authenticate** and ensures only the authorized user can access the device. Also, Windows 10 Pro enabled Windows Information Protection\* (WIP) helps prevent accidental data leaks by restricting user and app access to data based on policies you define.

\*WIP requires either Mobile Device Management (MDM) or System Center Configuration Manager to manage settings. These products sold separately. Active Directory makes management easier, but is not required.

[Click here](#) for more information on the ThinkPad X1 Series

## Get Used to Checking Your Bag

Starting at less than three pounds, the ThinkPad X1 devices are our smallest and thinnest devices yet. You might find yourself checking a lot to make sure it's really there.

## Sacrifice Nothing for Portability

With a smaller footprint than previous generations, the X1 devices are easier to hold, carry, and take your work on the go. But the best part? We've packed in even more processing power, more memory, and more storage to drive your business. Plus we managed to keep the incredible display. Now that's innovation.

## We've Got Your Back

With four layers of carbon-fiber reinforced chassis and a magnesium alloy roll-cage for added strength, we've engineered the X1 family of products to handle whatever comes your way. From spilled drinks, to drops and knocks, these devices are tested against 12 military-grade requirements and pass more than 200 durability tests. Whether it's a day at the office, or a day on the move, the X1 has you covered.

## Up and Running, Even if You're Not

Even when WiFi is out of range, the optional Qualcomm® Snapdragon™ X7 LTE-A means you always have connectivity and access to all your data and apps in the Cloud.

## From 0 to 80 in 60

X1 devices deliver up to 15.5 hours of battery life. And if you're running low, the RapidCharge technology provides 80% capacity in just an hour. So, a lunch break or a layover can easily boost your battery up to more than 12 hours.

## Prepare to be Thunderstruck

**The X1 devices include Intel® Thunderbolt™ 3, the technology that brings lightning-fast Thunderbolt to USB-C at speeds of up to 40 Gbps. Supporting enterprise thin-and-light PCs and mobile workstations. Thunderbolt™ 3 moves massive files, images and video at speeds 8X faster than USB 3.0. And with Lenovo's Thunderbolt simplified docking solution, support those heavy content creation or data intensive tasks easily.** Also, your experience is improved with faster charging, peer-to-peer data transfer and connection to two external 4K displays.

## Less Really is More

X1 Carbon is available with Microsoft Windows 10 Pro Signature Edition. No more trialware or unwanted apps. No more distractions — and easy provisioning for IT pros.

## We Mean ALWAYS Covered

X1 Carbon comes with a standard worldwide warranty. It means that you can get help in 160 countries. We work around the world so your business can too.

## Heavy Duty Security

Lenovo's biometric fingerprint recognition simplifies access management. Protect identity and secure data with **Intel® Authenticate** for more robust policy enforcement options.

# ThinkPad X Series

Smaller footprints and longer battery life make X Series the business traveler's trusted companion. Their craftsmanship, versatility, robust security features, and a range of convenient ports like the lightning-quick **Intel® Thunderbolt™ 3 port** ensure they are every professionals' preference.

In addition, Windows Defender System Guard ensures that only trusted software can run during start-up, isolates sensitive services and data, and makes certain low level tampering to be detected and remediated without impact.

Lenovo™

## Robust Security

Robust Security whether you're in the office, at the corner cafe, or at 30,000 feet, you can rest assured your ideas stay safe. Integrated security features like IR Camera\* for facial recognition allows easy facial login with Windows Hello, protecting your data from unwanted users. And the FIDO® Authentication provides better security for online services and is simpler and safer for user experience.

\*Optional feature

## Versatile Productivity

The modern office of today is fast-paced and collaborative. The thin and ultralight ThinkPad X Series optimizes your journey to success with the latest **8<sup>th</sup> Generation Intel® Core™ vPro™ Processors**. It's tested against 12 MIL-SPEC requirements and passes more than 200 durability tests, ensuring that it is built to survive daily business battles.

## Long Battery Life

The ThinkPad X Series delivers up to 12.5 hours\* of battery life. And if you're running low, the RapidCharge feature provides 80% battery charge in just an hour. So, a lunch break or a layover can easily boost your battery up to 10 hours.

\*MobileMark 2014 benchmark.

## Stay Connected. Always.

Connecting on the road or even in your own conference room — can be a hassle. That's why we've packed the ThinkPad X Series with a robust number of ports — including Thunderbolt™, USB 3.0, HDMI, and more.

# ThinkPad T Series

Powered by 8<sup>th</sup> Generation Intel® Core™ vPro™ Processors ThinkPad T Series builds upon superior design with the performance and durability professional users demand. Along with **Windows 10 Pro** that offers built-in malware protection to help keep the devices safe from viruses, spyware, and other malicious software. The ThinkPad T Series of products is ideal for companies who need true business-class notebooks with an all-day battery life

## Thin and Light with Incredible Safety

ThinkPad T Series starts at just 3 pounds and 18.8 mm long. Its carbon-fiber cover, spill-resistant keyboard, and shatter-resistant glass provide durability for work on the go.

## Powerful Processing

Equipped with the latest **8<sup>th</sup> Generation Intel® Core™ vPro™ Processors** and paired with 2GB vRam graphics option, users can switch effortlessly between their favorite apps — increasing their productivity and creativity along the way.

## Superfast PCIe SSD Storage

Unlike a regular mechanical hard drive, a Solid-State Drive (SSD) has no moving parts and performs faster — including booting up (nearly 3X quicker), opening files (as much as 30% faster), and transferring files (around 200 MB/s, compared to 50-120 MB/s). As well as being quieter, it's also more reliable, more rugged, and more secure.

## User Friendly, Business Friendly

Easy to set up and roll out, the T Series products are also quick to service, upgrade, and secure. From an everyday user to an IT technician, this business laptop is designed to make life (and work) easier for everyone.

Lenovo

# Lenovo V Series

Combining security and productivity features with a simple design, powerful **8<sup>th</sup> Generation Intel® Core™ vPro™ Processors**, and long battery life, V Series laptops are perfect for business owners and frequent business travelers. Plus, with Windows BitLocker\*, organizations can rest assured that their sensitive information is protected from unauthorized access — even if a device is lost or stolen. Windows BitLocker offers enterprise-grade security, providing IT with the ability to encrypt full disks.

\* Requires TPM 1.2 or greater for TPM based key protection.

## Powerful Performance

Enjoy the new standard for PC performance with the latest **8<sup>th</sup> Generation Intel® Core™ vPro™ Processors**. Blazingly fast and feature-packed with built-in security, they are ready to take your productivity, creativity, and entertainment to the next level.

## Secure and Reliable

When it comes to IT security and data breaches, you can never be too careful. That's why the industry-certified Trusted Platform Module is integrated into the Lenovo V Series products, enabling file encryption, password protection, boot protection, and more.

## Light Yet Robust

At less than 1" thin and weighing less than 2.1 kg, the Lenovo V Series products are designed for you to work from anywhere. Plus, there's no gap between the keys on the keyboard, so the build-up of dust and dirt, which can degrade performance over time, is vastly reduced.

## Plenty of Storage

With up to 1 TB of storage space, there's ample room for all your documents, data, and other digital files.

Lenovo™

# ThinkPad P Series

Users never have to choose between mobility and performance anymore. The ThinkPad P Series mobile workstations powered by **Intel® Xeon® Processors\*** offer employees a win-win situation with the flexibility of ThinkPads and the power of a workstation. In addition, Windows 10 Pro for Workstations enables users to power through advanced, compute-intensive workloads with server-grade data protection and performance.

\* (only in P70, P71)

[Click here](#) for more information on the ThinkPad P Series

## Free From the Plug

Thin and light despite its power, the ThinkPad P Series mobile workstations also boasts all-day battery life — using dual-battery configuration. Power Bridge Technology allows you to be in the field, in the office, or on the go — and still get things done.

## Enterprise-level Security

Whether at the cafe or cubicle, safeguard your data with the Trusted Platform Module technology, an enhanced fingerprint reader, IR face-recognition login with Windows Hello or an HD camera with ThinkShutter: all ensure data security and personal privacy.

## Connect with Speed

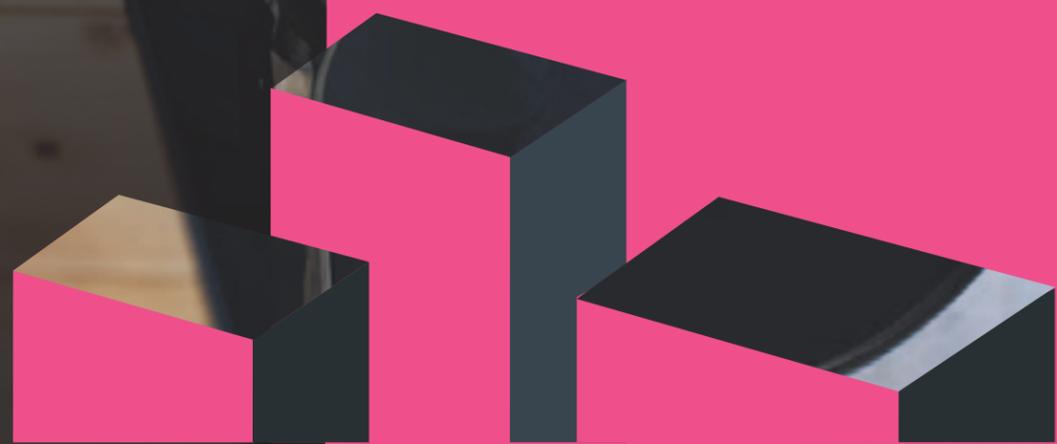

Move data between quickly with USB 3.1 **Intel® Thunderbolt™ 3** — simultaneously supporting high-resolution displays and high-performance data devices through a single, compact port. For enhanced mobility, connect to the internet wherever you go with the optional LTE-A connectivity option.

## Enhanced Reliability

With mobile workstations delivering high performance, keeping the CPU and GPU cool is critical to ensure high performance. The ThinkPad P Series mobile workstations\* use a dual fan cooling solution that employs two owl wing inspired fans to keep the CPU and GPU cool.

## Productive Performance

Powered by the latest Generation **Intel® Processors** and power efficient eMMC storage, can run multiple business applications without any lags. With integrated Active Pen, customer engagements become easier. Additional Wake-on-LAN enables remote troubleshooting, saving time and improving efficiency.

## Small but Secure

Security is priority on the Tablet 10. Discrete Trusted Platform Module chip (dTPM), Windows 10 Bitlocker, and Windows Hello access help encrypt user passwords and give a secure login experience.

## Compact and Sturdy

Lenovo Tablets can transform into a full computing device with its optional keyboard and USB-C dock. Tested for reliability and built with quality components, this tablet endures day-to-day stress.

## Built to Last

Tough enough for any kind of rough handling inside or outside the workplace, Lenovo Tablets have endured all kinds of durability tests, like shock test, hinge life test, and panel scuff test. Thanks to the dual layers of anti-smudge, and anti-fingerprint display this ultra slim tablet can survive everyday bumps and knocks effortlessly.

## Highly Secure

Security is top priority as it impacts not only the Cloud stored data, but also puts data of the entire enterprise at risk.

## Scale on Demand

Cloud solutions must be able to scale easily to meet an organization's needs as they evolve and grow.

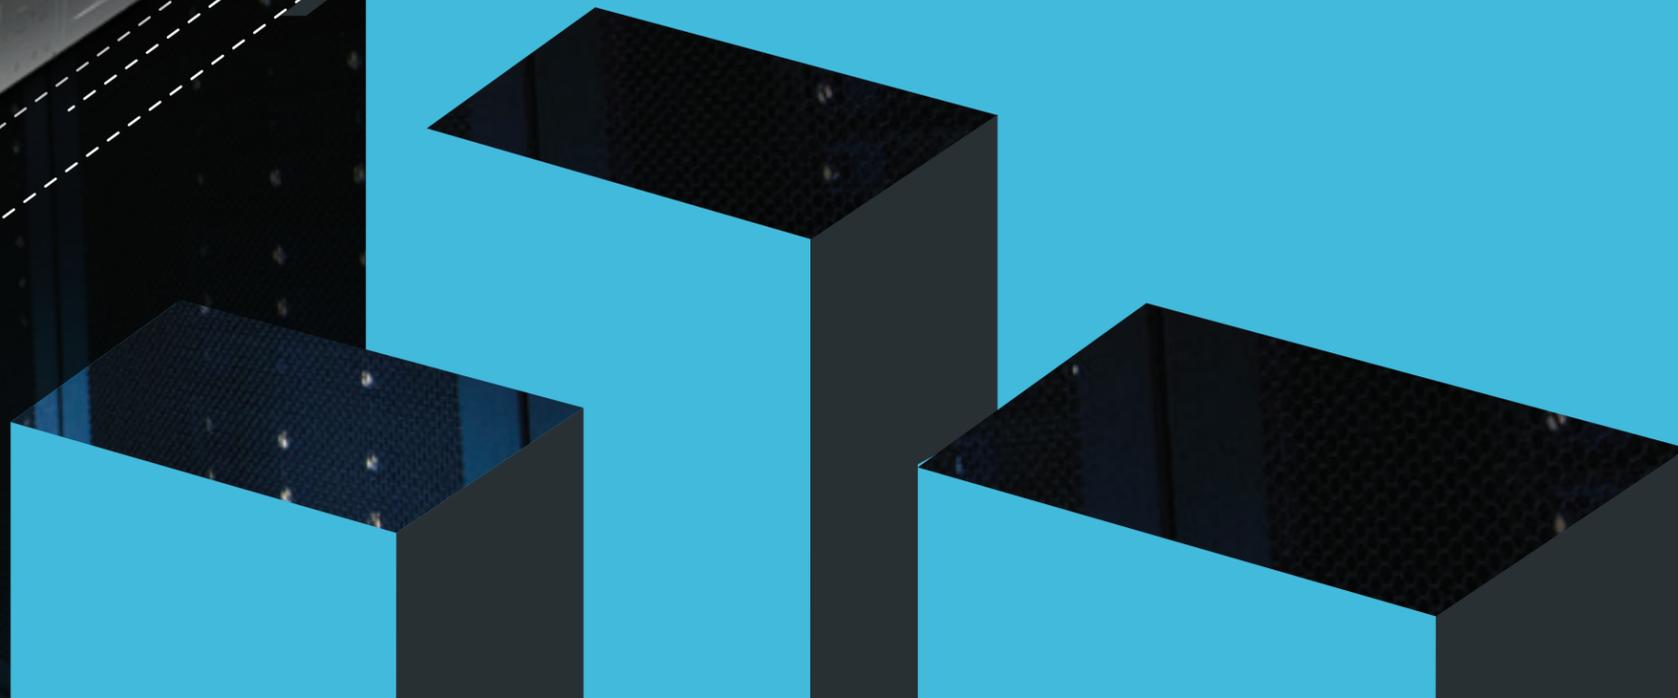

## Always Available

Organizations require Cloud solutions that are always operational, with minimal downtime.

## Easy to Manage

Manageability of a system – which includes the simplicity and speed with which a system is repaired and maintained, is essential.

## Support

**Premier Support:** users who are always on the go, need to be adequately supported to be productive at all times. Premier Support is a tech-support service designed for customers who can avail benefits such as bypassing basic troubleshooting, shorter waiting times, reduced repair times, and higher first-time fix rates

**Warranty Extensions:** realize your objectives for cost efficiency, improved service levels, and end-user satisfaction with warranty extensions. Lenovo's flexible warranty options are designed to fit the different needs of your business.

## Protect

**Accidental Damage Protection:** give mobile users a peace of mind with a service that addresses unexpected IT expenses associated with replacing certain damaged parts. It also minimizes downtime with convenient coverage in case of accidental damage for labor, parts, and full system replacement in cases when repair is not possible.

**Online Data Backup:** Online Data Backup is an easy-to-use, automatic online backup and recovery software solution. With this tool, organizations and mobile user groups can share storage without the need for administrators to allocate capacity individually.

**Expedited Depot Repair Warranty:** customers who purchase Expedited Depot upgrades will receive front of the line, highest priority for repairs in the depot. In the unlikely event that needed parts are backordered, Expedited Depot customers receive priority sequence for backordered parts.

**Keep Your Drive:** avoid any potential legal and monetary repercussions associated with a breach in data security with Lenovo Keep Your Drive service. It provides predictable upfront costs and eliminates the need for tracking failed drives in transit, giving IT staff the time to concentrate on mission-critical business activities.

# Lenovo for Workforce Mobility

Enabling the mobile workforce to be productive anytime, anywhere, and in any way they need to without compromising on security and manageability of their devices needs a robust unified IT infrastructure. Lenovo is uniquely capable to partner with you on this front. We deliver IT infrastructure solutions that truly equip the future for mobile workforces.
