The accelerating wave of virtual healthcare

Who?
Experience and scale are driving a radical shift in demand, capacity, and resources.
- The number of US virtual visits per day increased from 480 to 10,000 in 2020.
- 88% of providers have invested in remote patient monitoring technology.

What?
- Virtual care was named a quarter-trillion-dollar post-COVID-19 reality.
- 50% of telehealth visits are expected to continue post-COVID.
- Virtual visits are convenient, efficient, and convenient.

Where?
- The virtual health revolution is transforming the way healthcare is delivered.

When?
- Patients want to be at home, at the office, or on the go.
- Providers want to be able to deliver care anywhere.

Why?
- Patients and providers want a more convenient and flexible experience.
- IT infrastructure and the cloud have transformed the way virtual healthcare is provided.

How?
- Modern devices, technology breakthroughs, and Lenovo's proven reliability and security leadership are breaking down care delivery barriers.
- Virtual visits, telehealth rounds, remote patient monitoring, biometric devices, and coaching are some of the ways virtual care solutions are being used.

Virtual care delivers:
- 70% of patients are more likely to view telehealth favorably than before.
- Providers are interested in how virtual care can help.
- Patients are more satisfied with virtual care experiences.
