Rounding is an essential part of inpatient care. Through these daily patient status checks, care teams can collect information, answer questions, and collaborate on care delivery.

While invaluable, rounding’s not without its challenges. It can be time consuming, especially when a physician’s patients are spread across floors or buildings. Engaging specialists and family members in care planning can also be difficult. And, of course, there’s a need for strict protocols to reduce the risk of infections being spread from patient to patient.

Lenovo Virtual Rounding with Zoom uses smart technology to make rounding more efficient, convenient, and safe. Powered by Lenovo’s ThinkSmart View and Zoom, the popular video conferencing solution, this purpose-built system makes secure patient-to-provider communication easy.

**What is the value of going virtual?**

- **Time savings for clinicians and care teams**
  Visit patients without traveling between offices, buildings, or floors

- **Better engagement with specialists and family**
  Communicate easily with specialists and family members

- **Enhanced safety for care teams and patients**
  Reduce the risk of spreading healthcare-associated infections (HAIs)

- **Less personal protective equipment (PPE)**
  Limit the need for clinicians to discard masks and other PPE
Getting started with virtual rounding

Lenovo Health is focused on a bold vision to deliver smarter, transformative computing technology to healthcare — empowering clinicians and the patients they serve. If you’re ready to learn more about Lenovo Virtual Rounding with Zoom, we’re here to help. Contact your Lenovo representative or visit www.lenovo.com/Health
