3 ways to put people first in your next round of IT planning

With The Great Resignation still fresh in all our minds, it’s more important than ever to consider the role technology plays in creating better employee experiences — for those who use it and those who manage it.

### What’s on your employees’ wish list?

**The right technology**
- Employees are 230% more engaged and 85% more likely to stay 3+ years if they feel they have the technology that supports them at work.

**The ability to work from anywhere 4 days a week**
- Employees are comfortable with remote/hybrid work and want to maintain that arrangement going forward.

### What’s on everyone’s wish list?

**Corporate responsibility**
- 60% of consumers prefer brands that reflect their personal values.

**Sustainable practices**
- 80% of consumers indicate sustainability is important to them and 60% are willing to change buying habits to reduce environmental impact.

### What’s on leadership’s wish list?

**Focus on innovation**
- 76% of CEOs say it’s a challenge finding the right balance between business innovation and operational excellence.

**Increased agility**
- By 2024, 20% of Global 2000 CEOs will report an increased appetite for risk and improved resilience, both attributed to modular business redesign.
