

LET OUR INNOVATION WORK FOR YOU

Lenovo OEM Solutions offers:

- Extended Lifecycle Management with end-to-end solution integration, product transition management, and advanced end-to-end notifications
- A portfolio of Extended Life products that offer custom solutions for OEM
- A legacy of quality that has earned Lenovo #1 in reliability and made us the #1 PC market leader
- Strategic partnerships with reps you know and trust to provide value-added services
- Premier Support Services driving predictability, innovation, value, and collaboration

Your OEM solution requires an industry-leading partner with global presence.

Businesses around the world trust Lenovo, a global, public company with revenues of over \$45B, for their information technology needs. Lenovo is among the top three manufacturers of IT products from mobile to desktop to data center and is acclaimed for innovation, quality, reliability, supply chain, and customer satisfaction.

As an industry solutions provider, you want innovative technology to set your product apart from the competition and minimize lifecycle costs. You need the services to optimize, deploy, and support your integrated solution over the long haul.

With years of experience serving OEMs, Lenovo understands what's important to you. Choose Lenovo OEM Solutions and let our innovation, our global presence, and our record as an industry leader work for you.

Build a custom solution from the full Lenovo portfolio of award-winning products.

Lenovo offers a full portfolio of computing products ranging from powerful and resilient enterprise-grade platforms to energy-efficient, space-saving personal systems. We will work with you to find a custom solution to fit your integrated compliance.
