

Powerful productivity, masterful management

**The world is accelerating.
Your devices and deployments
better keep up.**

With many companies implementing work-from-home policies for employees, productivity needs to happen anywhere. Employees need devices with the speed and power to accomplish mission-critical tasks. Without interruption. And Lenovo has you covered.

The best business laptop. Period.

The Lenovo ThinkPad X1 Carbon was named *Laptop Mag's* best business laptop on the market for the third consecutive year.¹

Powered by the built for business Intel vPro[®] platform, the ThinkPad X1 Family delivers outstanding productivity with enhanced security and superior manageability.

You get all the features that have made ThinkPad PCs the #1 commercial laptops worldwide:

Award-winning designs

Long battery life

Rugged durability tested against 12 military-grade requirements

ThinkShield protection — hardware, software, services, and processes for end-to-end defense

ThinkPad X1 Carbon

Lenovo puts your IT team in the driver's seat.

Lenovo's modern devices with Windows 10 Pro give your employees the seamless technology experience they're looking for.

Productivity from the get-go

With Windows Autopilot, zero-touch deployment means employees simply unbox the device and start working, anywhere.

Unmatched security

Lenovo Secured-core PCs offer a full suite of advanced security safeguards.

Complete lifecycle management

From planning and deployment through end-of-life disposal, Lenovo services have you covered.

It's not either-or.

No matter where or how your employees are working today, Lenovo has the modern devices, services, and support you need to deliver peak productivity everywhere.

Talk to your Lenovo representative today or visit www.lenovo.com/EnterpriseSolutions to learn more.
