

Workforce Productivity & Collaboration

 Remote Work Enablement

Harnessing the Remote & Hybrid Revolution

Lenovo™

Remote work solutions that power your best potential

Connecting your employees and onboarding new hires in a remote setting are major challenges for any business. The Remote Work Enablement solution from Lenovo delivers flexible, mobile capabilities that can help you power the remote work model while saving time and money.

Ship a ready-to-go remote office

Save valuable time and avoid hitting IT speed bumps with Lenovo's new Remote Work Enablement solution that delivers all the hardware, software, and premium services your business needs to keep moving forward. We'll ship the essentials, ready-to-use with optional pre-configuration, direct to your employees at home or the office. Remote workers get up and running faster— with all the seamless connectivity they need to stay that way. Your IT department gets support with a full suite of comprehensive configuration services so they're free to focus on other efforts.

- Easy set-up can include PC, external display, accessories, software, and instructions
- Standardizes employee experience and speeds new employee on-boarding
- Consistent integration enables increased flexibility for remote and office-based workers
- Reduces downtime, technical issues, and IT administration by enabling end user deployment on day one
- Enables users to troubleshoot with custom drop-in-the-box services employee communications, custom documentation, deployment instructions, and support information
- Lowers employee turnover by powering remote and hybrid productivity, improving job satisfaction and results
- Speeds onboarding of new hires and delivers quick integration with the entire team, even in a remote setting

Built to drive today's hybrid workforce

Lenovo Remote Work Enablement solution powers your remote and hybrid teams with smart, efficient, innovative ways to collaborate and get things done. Easy to deploy and manage, these tools scale with your business. The result: enhanced innovative IT solutions, reduced costs and administration, and improved productivity and performance.
