# Connected justice

Support the integrity of the judicial system  
with powerful, reliable collaboration tools.

As communities become more digital, so must the public agencies that serve them. Among workers surveyed, 91% said they wanted to be more connected to their co-workers.<sup>1</sup> Enabling those workers able to work from home to be remote when possible can reduce resignations by a third, while also boosting productivity.<sup>2</sup> This is especially important when 33% of public sector workers surveyed say the pandemic has made them consider retiring.<sup>3</sup>

**91%** **said they wanted to be more connected to their co-workers.**

Digital transformation is also influencing judicial agencies. The increased use of digital evidence and demand for remote collaboration, from the courtroom to chambers to the prison system, highlights the need for more efficient data management, video processing, and communications — together with rigorous security and the support of experts who understand the data challenges facing government IT.

Mobile workstations that are powerful enough to support the data demands of video evidence and mobile enough to work from anywhere. Space-saving desktops and monitors that provide easy access when flexibility is vital. Collaboration technology that closes the digital communication gap and provides new, secure options for depositions and videoconferences.

## Protect public workforce data with ThinkShield.

The **ThinkShield** hardware-embedded and security software portfolio is designed on Zero Trust principles. With the Intel vPro® platform, Lenovo safeguards all the physical layers of a device.

ThinkShield builds protections for holistic and comprehensive security coverage.

## Premier Support frees IT from repetitive tasks.

**Lenovo Premier Support** gives you direct access to elite Lenovo engineers who will handle routine support requests to free you up. Get a single point of contact for 24/7, unscripted support to solve day-to-day issues quickly.

## TruScale is the simplest way to access all solutions.

**Lenovo TruScale™ Device as a Service (DaaS)** provides a simple, convenient way to access all of our solutions through an as-a-service model with one, predictable monthly fee. Easily add or remove devices from your plan or pause your service as organization needs change.

Lenovo recommends  
Windows 11 Pro for Business.

# Publicly owned and accountable

Lenovo helps you meet the increasing demands in courtroom collaboration, remote work, and data analytics with **ThinkPad**®, **ThinkCentre**, and **ThinkSmart** devices purpose-built for performance.

## ThinkPad P1 Mobile Workstation

This sleek 16" mobile workstation offers the professional performance of the latest Intel vPro® platform with Core™ H-Series processors and powerful graphics support for the video rendering needs of the judicial system with up to NVIDIA® RTX™ A5500 GPU.

- ✓ Blaze through heavy workloads while securing sensitive data using the **Discrete Trusted Platform Module (dTPM)** for encryption, a fingerprint reader, and a self-healing BIOS.
- ✓ **Intel® WiFi 6E\***, with optional **WWAN\*\*** and **Near Field Communication (NFC)**, combine with **MIL-SPEC certification** to give you both mobile workstation connectivity and durability wherever your community needs it.

## ThinkCentre® M90a Pro

This premium-performance, space-saving, modular, all-in-one desktop is independently upgradable for the unique, flexible needs of any data-intensive agency or courtroom.

- ✓ **Powered by Intel vPro® with up to 12th Gen Intel® Core™ i9 processors**, and featuring an industry-unique tiltable camera, this all-in-one also boasts the industry's first Teams large-room certification for collaboration.
- ✓ **Equipped with the end-to-end security of ThinkShield and Windows Hello™**, along with PrivacyGuard to prevent shoulder-surfing, the M90a is as secure as it is agile.

Lenovo recommends  
Windows 11 Pro for Business.
