Smarter solutions for today's borderless campus
Enable the ultimate borderless campus experience

Higher education institutions aren’t just places anymore. They’re an experience. And today, that experience extends beyond the physical college or university to wherever students yearn to learn more, explore new passions, and launch their futures.

The borderless campus is here to stay. In recent research, 49% of students said they preferred a hybrid class format — where they could attend either virtually or physically on campus — and 18% would prefer to be fully remote.¹

49% hybrid
18% remote

To make the borderless campus experience everything it can be, institutions need the right technology. Students, faculty, and administration all need access to the devices, services, and software that help them work more productively and collaborate more effectively. And, with remote activity ever more prominent, security for both networks and devices must be paramount.

Secure technology that fuels productivity and spurs collaboration

Lenovo digital solutions enrich the academic environment for students while giving faculty and staff the reliable, easy-to-use technology and built-in security they need to deliver memorable student experiences — wherever learning happens.
Students pursue higher education for many different reasons. Some have specific career goals, while others want to explore multiple possibilities — and still others are simply passionate about learning and want to absorb everything they can.

What do they all have in common? They need technology that gives them the productivity to enable their goals.

For today’s borderless campus, productivity means giving students and faculty the computing power to master every subject and bring them to life.

Powering students’ curiosity, goals, and dreams

The power to make productivity soar
Empower students wherever they work

Empower students wherever they work

Lenovo delivers higher education solutions like the ThinkPad® P Series workstations running Windows 11 and built on the Intel vPro® platform with the latest Intel® Core™ processors, designed for high performance on the go.

Imagine a student creating CAD schematics in the engineering lab. Does her computer offer the processing speed she needs?

Another is writing an essay in a local park. Does his computer have enough battery life to finish it?

A third student is designing restaurant interiors at the kitchen table. Can their computer graphics capture the full range of colors that make the design dazzling?

Lenovo desktops, laptops, and workstations are built to make sure the answer to all those questions is “yes.” In addition to inspiring and engaging students, our solutions give faculty, staff, and administrators the tools they need for seamless connectivity and reliability.
The power of learning together

Enhance collaboration between students and faculty

College or university work has never been a solo endeavor, but with hybrid learning environments, collaboration matters more than ever.

Research shows that students who participate in active, collaborative learning perform better on tests.  

And collaboration isn’t just for students. For faculty and administrators, improved collaboration can enhance the quality of their work and reduce attrition.

80%

More than 80% of learning design professionals say collaborative learning is “important” or “essential.”

91%

91% of educators say they want to be more connected to their coworkers.
Make collaboration seamless and reliable

Whether it's five students building a multimedia case study from five different locations, or a faculty advisor sharing feedback with a graduate student across campus, collaboration is at the core of today's hybrid learning experience. Lenovo offers the hardware and software to make collaboration seamless and reliable anywhere on your borderless campus.

The ThinkPad® X1 Carbon, running Windows 11 and powered by Intel vPro®, An Intel® Evo™ Design with the latest Intel® processors, makes it easy for students and teachers to collaborate and stay productive with strong, reliable connection.

And all Lenovo ThinkSmart devices — built on the popular Microsoft Teams and Microsoft Teams Rooms platforms — transform anywhere into a connected learning space with built-in ThinkShield security and ThinkSmart Manager from Lenovo on the Intel vPro® platform.
A virtual wall around your virtual campus

Make digital security a top priority

Unfortunately, higher education institutions are prime targets for cybercriminals. In fact, universities were the third-most targeted sector in 2022, suffering 13% of all US cybercrime.6

With students and faculty connecting from everywhere on campus — and, potentially, anywhere in the world — it’s critical to protect your networks and every device in them.

A robust security solution can be tailored to your campus, offering a multilayered solution that stays one step ahead of cybercriminals by helping keep your devices secure, blocking unauthorized users, stopping hacks and online threats, and safeguarding data.

Trust a comprehensive security solution

Lenovo ThinkShield — a comprehensive, AI-powered security solution built into all Lenovo education devices — evolves with the modern threat landscape to protect your institution and adapt to the needs of your staff, students, and faculty.

With hardware, software, services, and processes working in concert, our extensive ThinkShield security portfolio covers vulnerabilities completely and securely. These fully customizable solutions help your institution safeguard all your critical data and technology.
Lenovo TruScale Device as a Service (DaaS) is a fully managed subscription-based model that gives institutions a cost-effective way to offer faculty, staff, and students a complete portfolio of devices and software with built-in security. It lets you:

- Select from a full catalog of devices including workstations, laptops, tablets, and phones
- Simplify technology finance through our Lenovo Global Financial Services (LGFS) “Flex” finance program
- Keep devices running smoothly with Premier Support, Accidental Damage Protection, and warranty extensions
- Get expert services and automation that enable user-led deployment and configuration from the cloud

Imagine the borderless campus — without limits

Keep technology simple with Lenovo TruScale DaaS
Partner with Lenovo to unleash every student’s possibilities

The college experience is all about possibilities. Today’s borderless campus extends those possibilities to horizons near and far — if students and faculty have the tools to take advantage of them.

Partner with Lenovo to give every student the productivity, collaboration, and security they need to turn their possibilities into realities. Visit www.lenovo.com/Higher-Education.
