

We can help you reach your sustainability goals faster

Lenovo Accessories is working hard to reduce reliance on plastic packaging

Deliver the accessories your team wants, packaged with sustainability in mind.

Bamboo

In 2022, we piloted a solution that uses **bamboo fiber bag packaging** for select cables and adapters sold as stand-alone products.

Corrugated cardboard

Over 80% of Lenovo Accessories core commercial products use corrugated cardboard packaging, avoiding the use of plastic film coating.

In 2022, Lenovo Accessories began pursuing Forest Stewardship Council (FSC) certification with two products:

The Lenovo 65W USB-C wall adapter and the Lenovo professional wireless rechargeable keyboard and mouse combo. The FSC recognizes packaging made with materials that ensure sustainable management of the world's forests.

Lenovo

Reducing single-use plastic

Whenever possible, Lenovo Accessories leverages processes rooted in sustainability — and we keep finding ways to use even less plastic.

100% of the Lenovo Accessories products bundled in-box with Lenovo ThinkPad® notebooks feature plastic-free packaging as of 2023.

100% of plastic-based packaging tape will be eliminated from Lenovo Accessories by 2025.
