

Power modern healthcare with Lenovo + Microsoft Windows 11

Don't miss the deadline to upgrade!

Windows 11 is here — and better than ever. Pairing it with Lenovo Health devices is the perfect way to equip your organization for clinical and administrative productivity, efficiency, and security in today's evolving landscape.

Timeline to a modern clinical environment

Windows 10 remains supported through October 14, 2025. Upgrading to Windows 11 now ensures you'll have continuous OS support and the security and financial protections critical to your healthcare organization.

A fresh take on familiar features and functions

Windows 11 provides a familiar but refreshed modern interface — a new, enhanced user experience that maintains consistency for IT. And all the new Microsoft OS features and benefits are amplified by the quality, design, and innovation of the latest Lenovo devices.

Get ahead of the rush

As we move closer to the Windows 10 end-of-support date, demand for new Windows 11 devices is likely to increase significantly. Upgrade now to avoid inventory constraints.

 **Windows 11**

Lenovo recommends
Windows 11 Pro for Business.

Lenovo

Easy for clinicians and staff to be productive and collaborative

- Productivity features designed for the challenges of hybrid and on-the-go care
- More intuitive navigation with fewer clicks to get things done
- AI-powered multitasking and videoconferencing
- Smarter, easier collaboration with Microsoft Teams

15%

Organizations using Windows 11 saw a 15% increase in end-user productivity.¹

Easy for IT to be efficient

- Better performance consistency across device configurations
- Built on the same core as Windows 10, supporting the same IT management tools
- Compatibility with most Windows 10 applications, devices, and accessories
- Remote device deployment, security updates, and management

99.7%

Windows 11 has a 99.7% app compatibility.²

Easy for all to be secure

- Zero Trust-ready OS
- Built-in protection of Lenovo ThinkShield and Windows 11 mitigates risk with a layered approach to security
- Protections turned on by default to protect from malware and sophisticated attacks
- Hardware-based isolation, encryption, and malware protection

Windows 11

Lenovo recommends
Windows 11 Pro for Business.

*Copilot availability and rollout timing varies by market. Copilot with commercial data protection requires Microsoft 365 E3, E5, Business Standard, Business Premium or A3 or A5 for faculty, or accessed using Microsoft Entra ID.

Copilot in Windows*

Achieve more with less time and effort using Copilot in Windows. Your AI assistant at work does the heavy-lifting so you can do the extraordinary.

Perfect pairings

Lenovo devices designed for clinical environments complement an OS designed for hybrid work.

ThinkPad® T14

The perfect healthcare-ready laptop for busy clinicians whether at the bedside, in the office, or collaborating on a Teams call.

ThinkPad® T16

With its 86 Wh battery, this versatile laptop enables long-lasting mobility for care and collaboration on the go.

ThinkPad® X1 2-in-1

Combine the flexibility of a laptop, tablet, keyboard, and touchscreen with this 2-in-1 that meets clinicians' need for on-the-go adaptability.

ThinkCentre® Tiny and Tiny-in-One

This small-footprint desktop or all-in-one is exactly right for shared use on carts and throughout the clinical workspace.
