Smarter IT actively adapts for better employee experiences.

A year on for employee productivity...

2x 85%

Enhanced employee experience drives better business outcomes.

- 85% of businesses say productivity has improved.

- And 48% of those improvements are attributed to technology.

How can Lenovo help?

- Enhance IT's effectiveness.

- Drive performance.

- Eliminate costs.

1. Drive personalization with smarter Gen AI systems.

- With an AI-powered service for delivering hyper-personalized digital experiences.

- Ensure every employee has access to the technology that supports them at work.

2. Streamline processes to free up IT resources.

- Enhance IT's capacity to focus on strategic initiatives.

- With a solution that monitors devices remotely and can pre-emptively troubleshoot and fix issues.

3. Ensure robust security everywhere.

- Create a safer experience for employees.

- Optimize cybersecurity measures without compromising productivity.

4. Advance your sustainability agenda.

- Support a greener workforce.

- Lenovo Asset Recovery Services help you manage e-waste and maximize circularity.
