

Reimagine your workplace.

Mixed reality enterprise solutions from Meta + Lenovo

Immersive, engaging, and convenient, mixed reality experiences in the workplace are proving to generate better outcomes for companies that have been diving into this transformational technology. Meta Horizon managed solutions, along with the trusted enterprise support of Lenovo, are helping businesses leverage the power of mixed reality to work, grow, and connect.

Lenovo ThinkReality + Meta Horizon managed solutions

How is mixed reality evolving the workplace?

Smarter
technology
for all

Lenovo

Creativity & design

Mixed reality gives creative teams the ability to produce Digital Twins: lifelike designs that replicate the real thing.

- Launch seamless and immersive collaboration
- Foster feedback between stakeholders
- Accelerate design cycles to be more agile and efficient

Learning & training

Shifting learning experiences to mixed reality can improve outcomes, giving companies many of the benefits of on-the-job training while also reducing both the cost and the complexity.

- Deepen soft and hard skills training
- Improve productivity and experiences
- Enable safe, cost-efficient learning

Meetings & collaboration

Where traditional video conferencing tools put people in a box (literally), virtual reality sets them free—to be more present, more engaged, and more themselves.

- Enable shared experiences between colleagues
- Boost meeting flexibility and efficiency
- Enhance focus and productivity

Building community

Companies become communities when they foster deep connections between their employees. When that happens, those employees don't just feel like they're employed there, they feel like they belong there.

- Help remote employees feel connected and engaged
- Lower costs and environmental impact
- Connect executives with workforces

- TRACKING**
 - Hand tracking

Featuring full-color passthrough, Meta Quest 3S expands your work world with realistic, risk-free simulations that build skills four times faster than in the training center¹. Tune out distractions and dive deeper into the task at hand, co-create in real-time with 3D design tools, or accelerate learning with immersive simulations. Create inspired collaboration in mixed reality with expressive avatars and sophisticated audio to make you feel like you're really together, forging deeper connections and helping you see eye-to-eye, even when you can't be face-to-face.

Are you ready to leverage the power of mixed reality for your business?

Contact your Lenovo representative today and immerse yourself in the future of work.

Winning together.

Leveling up the way you do business.

Meta Horizon managed solutions is a suite of products and services designed to help businesses leverage the power of mixed reality. These solutions are helping businesses save 3-4 hours of work, improving productivity and positively impacting their bottom line¹.

Bestselling headsets includes Meta Quest 3 and Meta Quest 3S, where high performance meets great value, and employees can experience breakthrough mixed reality with crystal-clear, full-color passthrough. Every Meta headset is supported by Meta Horizon managed solutions, a subscription service ideal for companies of any size that includes essential features such as user, device, and custom app management, as well as customer support.
