

Security is critical to the future of education

What keeps education IT leaders up at night?

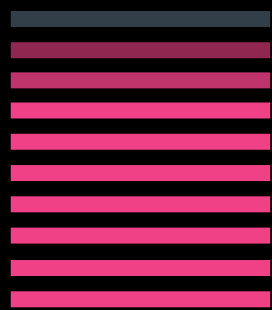

Not surprisingly, cybersecurity was cited as the #1 concern of education IT leaders in a recent survey.¹

Cybersecurity incidents in K-12 education were up 18% in 2020.²

Data security

90% of cyberattacks start with phishing.¹

Students and teachers in remote/hybrid learning environments are at heightened risk for phishing scams and other unsafe online behavior.

AI-powered antivirus protection from **SentinelOne** detects, prevents, and can automatically roll back from malware attacks.

IT management of security solutions

School-owned devices are deployed throughout the district in classrooms, offices, and homes.

Remote manageability features on the built-for-business **Intel vPro® platform** ensure that IT leaders never lose contact with students and their devices.

Student and teacher productivity

Remote students and teachers need easy access to IT support.

Lenovo Commercial Vantage gives users a central portal to manage hardware settings, set preferences, and check system updates.

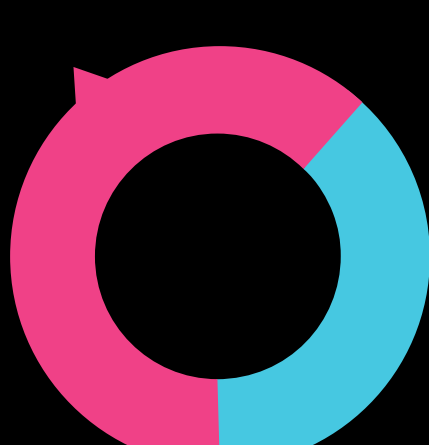

Persistent endpoint visibility and management from **Absolute** or **Intel® Active Management Technology** on the Intel vPro® platform reduce downtime.

Operating costs

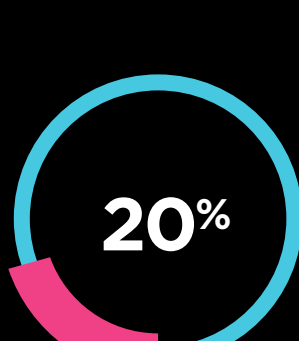

Licensing end-to-end device management with **Lenovo DaaS Managed Absolute** is the most efficient and flexible way to support a remote learning environment.

67% of ITDMs are extremely interested in moving to a DaaS model.³

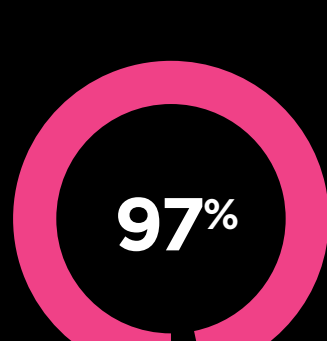

Hybrid learning

Even as more students return to in-class learning, the need for hybrid learning technology will persist.

One in five districts has adopted or plans to adopt virtual learning after the pandemic.³

97% of organizations are using secure collaboration tools such as Microsoft Teams.⁴

Wide adoption of collaboration software will continue as educators, students, and IT staff navigate the classroom of the future.

Evolve and thrive with ThinkShield security. ThinkShield is Lenovo's security portfolio of hardware, software, services, and processes — fully customizable solutions to secure your critical data and technology.

Get the most comprehensive protection with a modern Windows 10 Pro device powered by the Intel vPro® platform.
