ThinkShield

Yes, we've got protection for that.

Almost every component in a PC is susceptible to attack. The Lenovo ThinkShield portfolio is watching all of them.

Frictionless authentication

Eight modes of secure authentication — including biometrics, PIN, and picture passwords with Windows 10 Hello — take the peril out of passwords and credentials.

Lenovo's match-on-chip and match-on-network fingerprint readers are the most secure in the industry.

Next-generation antivirus protection

Cloud-based and autonomous, SentinelOne® uses AI to predict, prevent, and stop even zero-day attacks, alerting the network and rolling your devices back to a clean, known good state.

Secured-core defense

Lenovo Secured-core PCs boot up against a security checklist to verify integrity every time the device is turned on.

Persistent endpoint management

The Absolute® software dashboard delivers visibility and access to every device in your network.

Intel® Active Management Technology on the built-for-business Intel vPro® platform extends remote management capabilities to work through boot cycles or to examine the BIOS.

Data encryption

Whether data lives on a device hard drive or in the cloud, ThinkShield protections — including WinMagic — can encrypt it from end to end so sensitive data can be safely shared.

Safety seals for your device

Lenovo's rigorous Supply Chain Security program ensures the quality of all partners in the device manufacturing process.

Lenovo devices powered by the Intel vPro® platform deliver peace of mind. Intel® Transparent Supply Chain and Intel® Trusted Device Setup ensure the integrity of components from source to factory to end user.

ThinkPad X1 Carbon

ThinkShield: Smarter security by design

ThinkShield is Lenovo's security portfolio of hardware, software, services, and processes — fully customizable solutions to secure your critical data and business technology.

Lenovo recommends Windows 10 Pro for business, powered by the Intel vPro® platform.
