Lenovo

## Whatever you do to your new laptop, we've already done far, far worse.

Be glad you're not a Lenovo ThinkBook. **MIL-SPEC** testing is brutal, and deliberately so. Tested in extreme conditions, from the highest temperatures, to the lowest pressures, Lenovo ThinkBooks are built to withstand the most aggravated conditions. Ensuring they can resist sand and dust, as well as solar radiation mean that they are truly life-proof.

They're carried out for a reason; to ensure that your new ThinkBook Gen 2 meets quality, durability and design criteria, so that you can stay connected and productive wherever you work.

# ThinkBook

## From 'laptop boot camp' to the real world

Finishing up after a long day, and knock your backpack off the desk? Don't worry. We tested ThinkBook for all extremes.

Or maybe coffee on the keyboard is more your kind of mishap? Accidental spills won't slow your ThinkBook down. Nor will sand and dust, freeze/thaw, humidity, or other extremes.

Of course, the rigor of **MIL-SPEC** testing isn't the only reason to choose from the ThinkBook Gen 2 portfolio.

The slim, sleek good looks, versatility, high performance, superb displays, excellent connectivity, and a host of other thoughtful features and details all play their part.

It's reassuring to know that the **MIL-SPEC** regime, and our own 200 additional quality checks, have produced devices tough enough to shrug off the bumps and hazards of everyday life.

All the while being stylish enough to help you stand out when you need to impress.

## Industry-leading, MIL-SPEC 810H testing: 12 methods, 27 procedures

ThinkBook Gen 2 model	MIL-SPEC Standard 810G or 810H	Certified Procedures / Methods
